

SUMMARY

Software Developer Specializing In Frontend Development And Web3 Enthusiast. Strong Analytical And Creative Problem-Solving Skills Honed Through Years Of Coding. A Thirst For Knowledge And IT Enthusiast Looking To Utilize Expertise For Impactful Solutions.

EXPERIENCES

- **Frontend Web Developer**

Keitoto Studio | September 2024 - February 2025 ,WFH

Responsible for slicing design interfaces into attractive, adaptive, and intuitive interfaces using Next.js with TypeScript. And responsible for maintenance code and bug fixing.

- **Mobile Developer**

Skillup id | November 2023 - February 2024 ,WFH

Responsible for creating and maintaining attractive, adaptive, and intuitive interfaces using React Native, including code maintenance and bug fixing. Collaborated with cross-functional teams for seamless feature integration and conducted user testing to enhance the user experience, aiming to deliver high-quality applications that meet user needs and business objectives.

- **Frontend Web Developer - Intern**

PT Jaskipin Express | June 2023 - July 2023, WFH

Responsible for slicing the design interface into attractive, adaptive, and intuitive interfaces using ReactJS as the JavaScript framework and TailwindCSS as the CSS framework, and using Redux as the state management and transaction with the API. Responsible for maintenance code and bug fixing. Collaborated with cross-functional teams for seamless feature integration and conducted user testing to enhance the user experience, aiming to deliver high-quality applications that meet user needs and business objectives.

- **Fullstack Web Developer**

Freelance • August 2021 - July 2023, WFH

Create a dynamic web application project about courses and training institutions, using Laravel, InertiaJS, ReactJS, MySQL database, tailwindCSS and Create a dynamic web application company profile project about non-formal early childhood education, using PHP language, Vue JS framework, MySQL database, bootstrap

EDUCATIONS

- **Polytechnic of Harapan Bersama**

Bachelor of Applied Informatics Engineering • 2022 - 2026

Cumulative Grade Point Average : 3.75 from 4; Won several IT competitions organized by several National Campuses; volunteers create a competition information website from the informatics engineering study program

- **Vocational high school Muhammadiyah Gebang**

Software Engineering • 2019 - 2022

Best student in a batch; member of the Tapak Suci martial arts organization; Vice Chairman of the Muhammadiyah Student Association of SMK Muhammadiyah Gebang for the period 2021 - 2022; Won an IT competition organized by a national vocational high school.

CERTIFICATIONS

- **Frontend Web Developer Expert Course**

Dicoding Academy • 2021

This class covers modern Front-End: accessibility, animation, media, maps/location, service workers, PWA, deployment. The goal: build responsive web, easy to use, maintain, powerful on mobile.

- **Learn to Make Flutter Apps for Beginners**

Dicoding Academy • 2021

Materials Mobile app development with Flutter: introduction & installation, basics & package manager, introduction to widgets, navigation, assets, and deployment (APK, AAB, web). Final project: create a simple Flutter app.

- **Work In Tech Soft Skills Training**

Plan International Indonesia • 2022

Soft skills training such as self-awareness, teamwork, conflict management from Inco Academy Work In Tech Indonesia 2022 program from Yayasan Plan International Indonesia

- **Learning Machine Learning for Beginners**

Dicoding Academy • 2023

Machine Learning course 8 modules: ML basics & applications, project workflow, Supervised Learning (classification, regression), Unsupervised Learning (clustering), Feature Engineering, Overfitting/Underfitting, Model Optimization (Hyperparameter Tuning).

- **Fullstack development – Building an online course website**

BuildWithAngga • 2025

Laravel 11 Training Course with Filament, Integration Payment Gateway with Midtrans, Service Repository from BuildWithAngga course

- **Ethereum and Solidity: The Complete Developer's Guide**

Udemy • 2025

Learn to build apps with Ethereum, build blockchain apps, design/test/deploy secure Smart Contracts, understand the purpose & capabilities of Ethereum/Solidity, use Web3 v1.0, and see practical blockchain & mining.

AWARDS

- **1st Runner-Up In The General Category Of Krenova Competition Tegal City** | Kota Tegal • 2025
- **Finalist Of ITC Web Development Competition** | Universitas Dian Nuswantoro • 2025
- **3rd Place Winner Of CROWD IT Web Development Competition** | IBIK • 2024
- **Best Spirit Category KMIPN VI TIK** | Politeknik Negeri Jakarta • 2024
- **3st place in Landing Page Competition** | Institut Pendidikan Indonesia • 2024
- **Finalist (4nd) of UNISNU Web Development Competition** | UNISNU jepara • 2024
- **1st place in Web Development Competition** | Universitas Negeri Jakarta • 2023
- **2nd place in Web Development Competition** | IDN IT FEST • 2021

SKILLS

- **Programming** : HTML, CSS, Javascript, Nextjs, Typescript, React JS, React Native, PHP, Laravel, Tailwind, Bootstrap, SASS, MySQL, MongoDB, python, flask, C#
- **Tools** : git, github, gitlab, figma, Jira SCRUM, VSCode, Android Studio, Remix, Unity
- **Language** : Indonesia – Native, English – Intermediate
